

There is a definite link between productivity, reliability and maintenance of equipment. The primary benefits include reduced operating costs, consistent product quality and increased life of valuable capital equipment. Maintenance also preserves capital assets and fulfills safety, insurance and regulatory obligations.

The Dürr Megtec Preventive Maintenance (PM) Services staff can help you maintain your equipment. Our team of factory-trained technicians have an average of over twenty years of experience. They can evaluate your equipment needs to keep it functioning at its optimum level. They can also save you money by helping you avoid downtime, providing annual energy saving equipment adjustments and suggesting component upgrades.

Why Preventive Maintenance?

- Ensure safe operation
- Increase operational efficiency
- Improve product quality
- Improve energy efficiency
- Reduce unplanned downtime
- Increase equipment value and serviceable life

Minimize downtime

- Best insurance against equipment breakdown
- Keeps your productivity level at optimum levels

Ensures peak performance

- Save money on gas and electrical costs with component upgrades
- Reduce energy costs with annual adjustment, balancing and optimizing of fans and dampers
- Improve operating efficiencies by analyzing current process energy usage

Regulatory requirements

- Provide proper documentation that required maintenance is being conducted with proper calibration of thermocouples and instrumentation
- Stay ahead of environmental requirements as required in many states

Maintenance staff

- Frees up your staff for more urgent tasks
- Work can be completed during planned equipment downtime

Product Upgrades

- Keep your equipment up to date and running with the latest technologies, product improvements and safety upgrades

Other Benefits

- Strategically located regional technicians
- Large inventory of replacement parts
- Detailed reporting and record keeping
